

Portable Calibration Gas Kits

Testo calibration kits allow quick and easy calibration in the field! High pressure refillable bottles (2000 psi) hold 170 liters of gas for more calibrations. Regulators are constructed of 316 stainless steel and are corrosion resistant. An integrated rotometer regulates excess gas flow, provides controlled gas delivery and protects analyzer from high pressure.

- Highest quality gas mixtures
- Includes all gases and hardware needed to perform routine calibration
- Packaged in a rugged plastic case for easy transport.
- Re-fillable / re-usable
- 170 liters / bottles

PART NO.	DESCRIPTION	PRICING	AMT.
0554 9018	Three Gas Kit , includes three of the gases below, one regulator with flow control, rugged transport case and hose fitting (select 3 gases below)	\$ Call	
0554 9019	Two Gas Kit , includes two of the gases below, one regulator with flow control, rugged transport case & hose fitting (select 2 gases below)	\$ Call	
0554 9016	CO cal gas 100 ppm (in nitrogen)	per bottle if purchased separately (call for \$'s)	
0554 9010	CO cal gas 500 ppm (in nitrogen)		
0054 9017	NO cal gas 100 ppm (in nitrogen)		
0554 9011	NO cal gas 200 ppm (in nitrogen)		
0554 9012	NO2 cal gas 100 ppm (in air)		
0554 9013	SO2 cal gas 200 ppm (in nitrogen)		
0554 9014	O2 cal gas 7%		
0554 9015	Methane cal gas 5000 ppm (in air)		
0554 9027	CO2 cal gas 17% (in nitrogen)		
	NIST certificate per bottle		\$ Call
0554 9024	Regulator, stainless steel with flow control	\$ Call	
0554 9026	Two Gas Case, for safe storage and transport of 2 bottles and parts	ordered sep.
