

testo Portable Calibration Gas Kits

Use the chart below to create your own cal gas kit!

Testo calibration kits allow quick and easy calibration in the field! High pressure refillable bottles (2000 psi) hold themos cal gas (170 litres) for more calibrations. Stainless steel regulators are 316SS corrosion - resistant construction. An integrated rotometer regulates excess gas flow, provides controlled gas delivery and protection from high pressure.

Superior Convenience

- Highest quality gas mixtures
- Includes all gases and hardware needed to perform routine calibration
- Packaged in a rugged plastic case for easy transport.
- Re-fillable / Re-usable (credit towards next order)
- 170 liters / bottles

Ordering Information			
Part no.	Description	Qty	Call for Pricing
0554 9019	Cal Gas Kit, includes two of the gases below plus regulator and rugged transport case & fittings (includes \$75.00 bottle deposit per bottle)		
0554 9010	CO cal gas 500 ppm (in air)		
0554 9011	NO cal gas 200 ppm (in nitrogen)		
0554 9012	NO2 cal gas 100 ppm (in air)		
0554 9013	SO2 cal gas 200 ppm (in nitrogen)		
0554 9014	O2 cal gas 7%		
0554 9015	Methane cal gas 5000 ppm		
	NIST traceable certification of the gases		
0554 9024	Regulator, stainless steel		**
0554 9026	Plastic case, for safe storage and transport of 2 bottles and parts		
0554 9020	Calibration flow device (CFD)		

Ship to Address
