Wireless Bluetooth 2.0

NEW Wireless Communication Solutions

Extend your testing range with testo's new wireless communication solution. Put the analyzer where you need it and simply sit back and test... up to 330 feet away! New generation communication technology provides the means for easier testing.

Collect emission measurements up to 330 feet away

features:

WIRELESS ADVANTAGES

- Increased safety
- Eliminates USB and RS232 connection length limitations
- Eliminate long sample hoses and data cables
- Increase response time by locating analyzer near source
- Uncomplicated data transfer directly to PC
- Saves space with no cable requirement
- Print results from control unit with integrated printer
- No more cable danger from sharp or hot objects

2.0 BLUETOOTH ADVANTAGES

- Range is 10 times greater than V1.2
- Data transfer rates 3 times faster than V1.2
- FCC approval

It's about convenience, simplicity and safety

When you lose the wires... you simplify testing by reducing set-up time and communication cables. Save money by reducing the extra expense associated with buying and maintaining long sampling lines and hoses and eliminate the hassle storing and transporting them.

When you lose the wires... you have the convenience of placing the analyzer near the source while you read measurements, print results and have complete control in the control room or in your truck, away from inclement weather. It's safe too ...no more risk climbing up and down ladders... and just think of the time that saves!
